

# Slitting Machine

## Model - SLM

The Slitting Machines **SLM** are widely used to divide a single roll into two or more smaller rolls or to trim the selvage from the rolls. This way the finished rolls can be used immediately for further process such as vertical blinds production. These machines are specially designed for fabric manufacturers and fabric distributors.

## Features & Options

- PLC controlled system
- Touch screen for easy machine operation
- End detector
- Edge guiding system
- Programmable length measurement
- Trimmed selvage extraction
- Cross cutter
- Slitting system with one or more slitting units
- Available with various cutting systems
- Inspection table with bottom illumination

## Application

WOVEN

NON WOVEN
